

Statement to EU Directive 97/23/EG, Pressurized Devices

VSE Flowmeter

VSE flowmeters are pressurized devices according to article 1, paragraph 2.1.4. of above mentioned directive. Therefore they are subject to the regulations to this directive.

According to article 3, paragraph 1.4., VSE flowmeters have to conform with the technical requirements of the guideline. The fluids to be measured are belonging in most of all cases to the class 2, defined in article 9, paragraph 2.2.. VSE flowmeters do not reach the limit values as defined in article 3, paragraph 1.1..

The technical requirements for VSE flowmeters therefore are limited to the parts indicated in article 3, paragraph 3. It means the devices have to be designed and manufactured in conformity with acknowledged engineering, such as practiced in one of the member states. Herewith this is confirmed.

Beside the paragraph declares that these devices must not have a CE marking according to Directive 97/23/EG. Therefore we do not issue declarations of CE and our products are not labelled according to 97/23/EG.
